

SpaceTEC® Composites Exam

The SpaceTEC® Composites Certification exam is a three part exam consisting of a 70 question, computer based, written exam, followed by an oral and practical evaluation of an individual's technical knowledge and skills.

The Composites examination focuses on the following subject areas: Composites Knowledge, Fabrication Methods, Inspection, and Health & Safety.

The minimum passing score on the written exam is 70% or higher. Applicants scoring less than 70% in any of the above subject areas will be required to pass an oral examination for that topic.

The practical section consists of two practical hands-on exercises which are evaluated by a SpaceTEC® Examiner.
